## **DETAILED ACTION**

1. Claims 1-3 are in the application.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Gibbins.

Gibbins discloses a vessel having a motor driven propeller and a cavity in the hull guiding the water flow into the propeller wherein the surface area of the cavity is disclosed as being substantially constant in a direction substantially perpendicular to the longitudinal axis of the vessel. The cavity increases in width upstream from the propeller.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Price discloses a vessel including a propeller in a tunnel wherein the tunnel has a substantially constant surface area. Wormser and Nystrom disclose marine vessels with a propeller mounted in a tunnel.
